Annex: Product List 134

As the knowledge in the world of high-tech products progresses, Iran's pharmaceutical industries are actively working on conventional medicines, biotech, and vaccines in more than 170 pharmaceutical factories, which are all operating within Iran.
Besides the active pharmaceutical factories, a large number of pharmaceutical factories are establishing rapidly in industrial estates which significantly increases the share of private-sector factories in shaping the pharmaceutical industry.
Despite imposed sanctions on Iran during the past four decades, having benefited the able and skillful hands and brains of its scientists, pharmaceutical industry has succeeded to manage and stabilize the pharmaceutical market and meet the needs of patients.

Although we proved that the imposed sanctions did not impact the pharmaceutical industry, lack of effective communication between world banking system and Iranian counterparts made everything difficult to supply the medicine.

In addition to the problems of medicine supply management in emergency situation of the country, the corona pandemic increased the responsibility of the pharmaceutical industry. Iranian pharmaceutical companies succeed to pass this hard test tactfully and by relying upon the ability of its local experts, they have been able to provide effective medicines for this infectious disease immediately after the last methods of treatment in global protocols.

We are proud to say the Iranian pharmaceutical team by all industry actors such as pharmacists, chemists, engineers, etc. runs a pioneer industry.

Iran Pharma's target is to expand export markets for Iranian products and raise the trade balance with other countries within the next 5 years.
This goal will be feasible in cooperation with the Food and Drug Administration of Iran and other organizations.

Plant Location:	No. 110, West Bahman St., Khajeh Nasir Toosi St., Sepher Industrial District, Nazar Abad, Alborz, IRAN
Capital:	Annual capacity of refinery plant is 10,000 liters of immunized plasma which resulting to more than 500.000 immunosera vials.
Employees:	40

Company Profile:
Padra Serum Alborz is the first plasma refinery plant in Iran that produces plasma-drived medicine under cGMP guidelines. According to national need for antivenoms Padra Serum aims producing efficient and safe Antisnake and antiscorpion venom serums.
Our Technology:
Padra Serum develops some improvement in antivenom production in comparison with available antivenoms in Iran pharmaceutical market as below:
1- Venom fractionation instead of crude venom: the venoms contains of different kind of proteins and other molecules. All of these molecules stimulate horse immune system and result to wanted and unwanted IgGs. Unwanted molecules are eliminated with venom fractionation.
2- Caprylic acid precipitation instead of ammonium sulfate: ammonium sulfate precipitation protocol generally leads to a recovery of antibodies of 40-50% and to the formation of protein aggregate. The final product of this procedure used to contain a relatively high proportion of contaminating proteins, such as albumin, but caprylic acid precipitation allows the production of antivenoms of relatively high purity and with a low protein aggregate contain. The recovery in Caprylic protocol may reach up to 60-75%.
3- Viral inactivation and removal validation: the main concern in plasma derived medicines is viral contaminations. Padra Serum use and validate two techniques for viral inactivation (Low pH treatment and CA treatment) and also nanofiltration which specially designed to remove viruses.
Premises:
Padra Serum's premises founded based on cGMP including a plant for plasma refinery, venom treatment laboratories for fractionation and quality control of venoms, a serpentarium for quarantine the snakes and scorpions collected from various regions of country and milking of their venoms, an animal farm for housing laboratory animals needed for antivenom analyzing and horse stables for horses used in antivenom production.

Company Profile:

Shafa, under the name of the Iranian License Company, began as a pharmaceutical and hygienic manufacturer in 1969. After the Islamic revolution in 1979, imports of pharmaceutical products decreased with domestic production being mandated by the newly formed government. The newly formed government also made it mandatory that pharmaceutical companies be controlled and domestically owned. After years of being in production Iran license changed its name to Shafa pharmaceutical and hygienic manufacturing company and began to invest further in manufacturing of both pharmaceutical and hygienic products.

As a result of their long term commitment to product safety and quality, Shafa Pharmaceutical and Hygienic Co. have become one of the most well-known and respected companies in pharmaceutical industry in Iran. Shafa pharmaceutical and hygienic is a privately owned company and they are determined to bring the highest quality and standards to the Iranian industry. Their devotion in the past five decades in their core values has given Shafa pharmaceutical and hygienic the foundation from which to build their future. Their vision to be the forefront in pharmaceutical technology and strategic partnership development in the Middle East is being recognized by their investment in technology, infrastructure and personnel.

Shafa Pharmaceutical and Hygienic has a state of art GMP facility and is aiming to be a global pharmaceutical company to attract business opportunity for multinational pharmaceutical companies to enter joint venture or contract manufacturing with shafa.

Research and development teams are busy working on new innovations that will be added to the existing product line. The new facility which has 54,000 sqm of Production area is planned to have 5 departments, of which 1 is already operational and the rest are under construction.

Major Shareholder:	Astan Quds Razavi
Employees:	250 Personnel

Company Profile:

Shiraz Serum Company (24,000 sq² land and 3,200 sq² clean rooms) with the use of the best and most modern pharmaceutical machinery of the world, meeting GMP guidelines and Europe pharmaceutical standards is manufacturer of pharmaceutical solutions(L.V.Ps & S.V.Ps), Plasma Substitutes and single dose drops.

It is worthy to mention that there is a high rate of nosocomial infections which thread thousands of lives every year in Iran and its neighbors and impose considerable economic cost on the health-care system, as L.V.P production fails to meet the required standards. We, in Shiraz Serum Pharmaceutical Company, are proud to produce L.V.Ps available in three-layered PP bags and to make collapsible bottles (SBM type) with simultaneous filling for the first time in the world, as well as Single Dose Drops and needle-free Ampoules, all of which can prevent a major part of nosocomial infections. There is no standard L.V.P production in compliance with GMP in Iran except in Shiraz Serum.

Certificates:

These bottles made in F.A.T by Shiraz Serum's machinery in Germany, received "The Best L.V.P Bottle" recognition at Medica exhibition.

Therapeutic Groups and Pharmaceuticals with Capacity for Exports:

Infusions, LVPs, SVPs, Ampoules, Single Dose Eye Drops, Antibiotics, Rehydration Therapy, Bag infusion,

Target Countries for Exports:

Regarding the technology and machinery provided by the best manufacturers in the world, Shiraz Serum products compete with similar products in Europe and the U.S. Accordingly and given Iran's location, it is easily possible to export our products to central Asia, Middle East and neighbor countries such as Iraq and Afghanistan,also Yemen, Syria and….

Zahravi Pharmaceutical company

Founded:	1365
HQ Office:	Tehran
Plant Location:	Tabriz
Employees:	397

Company Profile:

Established in March 1986, Zahravi Pharmaceutical Company developed its manufacturing sector in February 1992 with an ambitious mission to care for life. To achieve this purpose and to help people live better, longer and healthier, we have combined our knowledge, technology, and expertise to manufacture high-quality products.

At the beginning, company was engaged in production of few dosage forms, but after two decades, through the skills and dedication of its personnel and by taking advantage of state-of-the-art equipment, Zahravi Pharmaceutical Company has become one of the most successful manufacturers of pharmaceutical dosage forms in Iran. Zahravi Pharmaceutical Company is pioneer in manufacturing softgel capsules, Immunosuppressive agents as well as drugs for treatment of multiple sclerosis, in Iran. Our main products consist of Immunosuppresive agents Iminoral® (cyclosporine), CellCept® (Mycophenolate mofetil) under license of Roche, and softgel capsules such as calcitriol, omega-3, vitamin A, D3 and E-Zavit® (Vitamin E).

Today we market more than 100 products in a variety of dosage forms to supply domestic needs as well as exports; such as: softgel capsules, tablets, capsules and ampoules.

With workforce of more than 300, the premises are located in Tabriz, in a 120 000 sq meters lot 28 000 sq meters of which are allocated to the plant itself.

All our products are manufactured according to cGMP regulations and all of manufacturing facilities are centralized at our ISO certificates.

We define success as something further than performance in the marketplace. Quality is ingrained in our work. To guarantee continuous improvement in our performance, several laboratories are dedicated to formulation and development.

As a health care company, Zahravi is committed to preserve the environment in which we live. We consider safety and environmental considerations in all phases of drug manufacturing.

We recognize that people are the cornerstone of Zahravi's success, so we are deeply committed to meet the needs of our internal and external; i.e. our stakeholders, staff, physicians and patients.
